Module wgTeams

Version: 1.06

for XOOPS 2.5.7

User Manual

© 2014 The XOOPS Project (www.xoops.org)

Module Purpose

wgTeams is a simple module for presentation of your team(s).

You can defined various teams and people. After that you can link each person to one or more teams. The default information of a person (e.g. email address) will be used for all teams. You can define additional information fields, which will be used for a team/member combination, e.g. skills for this team, postion in the team, and so on.

All used templates on user side are fully responsive.

> **Pay attention:** This module works only in combination with a bootstrap theme or you have to include bootstrap files manually to your theme.

1. Install/Uninstall

No special measures necessary, follow the standard installation process – extract the module folder into the /modules directory. Install the module through Admin -> Modules -> Install Modules (see below). Detailed instructions on installing modules are available in the XOOPS Operations Manual.

1.1 Install

- Extract folder 'wgteams' in your module directory
- Log in as admin and goto admin area
- Install the module through Admin -> Modules -> Install Modules

Figure 2 Module administration and install

- configure the module
- the next steps are setting the rights under System --> Groups.

1.2 Uninstall

To uninstall the module, just click on the red arrow

Figure 3 The Module Administration and un-install

2.0 Administration Menu

2.0.1 Menu

There are seven (7) menu options on top. These can be seen in the graphic below above the Module's Administration tabs. The menu options available are described in the table below.

Option	Action
Preferences	Here you can configure your preferences for the module
Update	Click here if you've made some changes to the module, uploaded new files, etc. – this will recompile the module and update all entries in the database
Blocks	When you click here, it will redirect you to the Blocks section of XOOPS, and select the blocks related to your module
Templates	Here you can modify the standard module templates using the XOOPS Template manager
Comments	This module does not support Comments so the link takes you the XOOPS Comment manager
Uninstall	Links to the module uninstall option, the same as clicking the "red arrow" on the module administration page
Go to module	If the module is visible on the user side, this will take you there

2.0.2 Dashboard

On the dashboard you get a short overview about the functionalities and the content of the module.

2.0.3 Functionalities for admins:

- Infofields
- Teams
- Members
- Relations
- About

- Help

3. Preferences

In the module preferences you can set various options for this module:

3.1 Options in detail

Keywords

You can add keywords, which are added to the meta tags. Seperate the keywords by comma.

Admin pager

You can define the number of items for lists in admin area.

User pager

You can define the number of items for lists in user area.

Start page

Define, what should be shown when calling the module (index.php) You have following options:

- An overview with all teams (but without members)
- All teams with all members
- The first team

Editor

You can decide, which editor should be used for editing on admin sides.

Max size

Please define the maximum file size foruploads file. You have to enter the value for bytes (10485760 = 1 MB).

Mime-Types

Define which mime-types are allowed for file upload.

Show labels

Please decide, whether there should be a label before the information, e.g. before the name the label 'first and last name' will be shown on user sides. If you select 'No', only the name himself, the phone number himself an so one will be shown.

Show breadcrumbs-navigation

Please decide, whether a breadcrumbs-navigation should be shown on user sides.

4.0 Operating Instructions

For presenting a team do following:

- Create a team
- Add your members
- Add your additional infofields
- Define the relations between teams and members

5. The User Side

For the users there is no action required on user side.

Depending on your settings/preferences you can present your teams in various ways.

5.1 Possibilities for presentation

You can show your team(s)

- via the index page
- or with a block (see also Blocks)

5.2 Possible presentation styles

- wgteams_admin_teams.tpl

9. Module Credits

This module was originally developed by Goffy (www.wedega.com).

This module was created with TDMCreate.

TDMCreate from TDM Team

Modified by Timgno (http://www.txmodxoops.org)

Contributors: Mamba (http://www.xoops.org), Goffy (German Xoops)

Included ideas for Logo Generator from Trabis (Publisher module) and Suin (Koins module)
